From Our President

2026 is well underway, and we expect this year to be less stressful than recent years, with fewer tariff-related issues and less cost unpredictability. We will do our best to keep you informed of pricing changes as they occur; however, many vendors no longer provide 30 days' written notice. In many cases, we only learn of increases at the time of purchase.

We anticipate cost increases of approximately 10% throughout the year on paper products, including copy paper, printing paper, and wide-format paper. Copiers, printers, and related supplies were the most impacted in 2025, with increases ranging from 15% to 20%. Unfortunately, we have already seen additional increases in copiers and printers this year.

Despite these challenges, we remain committed to providing high-quality, cost-effective solutions for all your printing needs. From commercial printing to office printing, we continue to be your trusted source for low-cost, reliable solutions.

With Gratitude,

'Weave' Got Your back!
